NEW AND IMPROVED CLOSET PANS.

STEPHEN GREEN AND CO.

IMPERIAL POTTERIES, LAMBETH.

These Pans will be found to combine all the latest improvements, with the advantage of having a larger water surface than any other kind of trapped Pan, by which arrangement the sides are kept perfectly clean. The trap is not larger than usual, and has its smallest diameter at the bottom of the Pan, increasing to the end, so that anything passing the neck cannot possibly stop or clog the drain.

Manufactured in superior double-glazed Stoneware, white and smooth inside, at the SAME PRICE AS THE COMMON PAN; with Patent Valve, 1s. 6d. extra.

STOCK & SON'S SOIL-PAN SERVICE-BOX.

The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of house soil-pan apparatus as will enable the "constant supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of water in places of this description, to which water companies now so strongly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by propping the valve, weighting the handle, or by other means. It is so constructed that, as long as the footage-valve remains open, a further supply cannot enter the service-box from the main. Drawings and description may be obtained from STOCK and SON, Manufacturers of Plumbers' Brass-work, Sanitary Chests, Rotary Screw-down Taps, Fire Plugs, Gas Fittings, and Church Furniture in iron and brass, Temple-road, Birmingham.

SUPERIOR GLAZED STONEWARE DRAIN

PIPES, invented and manufactured by

WILLIAM NORTHEN, UNION POTTERY, No. 14,

VAUXHALL-WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c. that he has completed "Spencer's" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it insures perfect uniformity in form and size, both of pipes and sockets, the latter being of a different and better construction than any others now in use; and the pipes and sockets being made by one process are yours from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufacture, which is equal to glass, and renders it impossible to the drains impassible.

W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:—

Rimby and Co.'s Wharfs: Kingsland, Blackfriars, and Millbank.—Martin and Wood's Market Wharf, Bermondsey-park Basin.—J. C. Hilbert's, Crown and Horse-shoe Wharf, No. 6, Upper Thames-street.—W. Peters's, North Wharf, Paddington.—G. Richardson's, Heath Wharf, Stepney.—G. Erith's, Cambridge Heath Wharf, Hackney.—W. Parry's, Canal Bridge, Old Kent-road.—Hillwood and Co.'s Wharf, Kensington Basin, and Creek Wharf, Hammersmith.—J. Corbett's Depôt, Brixton-street, Chelsea; and at the Pottery.

PATENT ORNAMENTAL ZINC.—Specimens of this new invention may be seen at Mr. F. H. Greenwood's Office, No. 22, Southampton-street, Strand, London; and manufacturers are informed that they may obtain Licences from the inventor upon favourable terms. Zinc, coated and ornamented by the new process, is available for many novel purposes with the recommendations of economy, durability, and good effect, and therefore the invention is well worth the attention of the scientific public in general, and of architects, builders, decorators, furniture manufacturers, japanners, metal workers, and many other manufacturers, in particular; and especially of such persons as are desirous of enlarging the sphere of their business, or of embarking in a new and profitable manufacture requiring a very small capital.
